

CAREER PROFILE

Kubernetes, Docker, and Helm expert with a strong aptitude for mentoring, processes, and systems while using collaborative problem solving. Proven track record of optimizing and sustaining systems through automation, using minimal costs. Anything can be automated. Skilled in delivering automation solutions that drive productivity and innovation. Experience in Azure and AWS, cloud/edge/programming language agnostic, and able streamline complex deployment processes while troubleshooting issues.

EXPERIENCES

Senior DevOps Engineer JUNE 2023 - Present
FaceFirst

Build automations and pipeline tools for builds. Created standards and globalizations for pipelines to detect the makeup of a repository and build using best practices for the language. Support poly/mono repos and a migration off of submodules into nuget packages.

- Windows shop
- Terraform
- On-prem deployments
- GitHub Actions

Senior DevOps Engineer APRIL 2022 - FEBRUARY 2024
Hanwha Techwin America, San Jose

One of the founding members. Defined the multi-tenant cloud environment, including security and account structure. Trained teams on Agile methodologies with a 3 day interactive seminar. Managed relationships with multiple teams as well as act as scrum master and scrum of scrum master. Established/enforced coding standards for quality and vulnerabilities. Created open source pipelines and templatzize pipelines in GitHub for asynchronous code scanning, auditing, and environment deployment and scalability using K8S, K3S and helm.

- AWS multi tenant cloud
- MacOS shop
- Terraform
- Traefik k8s network
- GitHub Actions

Senior DevOps Engineer JANUARY 2021 - APRIL 2022
Motorola Solutions Inc, Boston

Build and deploy powershell modules to create SSRS server and grafana as an azure container. Design/implement security model for Azure AD and Azure SQL. Automate testing of federated authentication using graph api. Design/implement express route virtual network. Impliment/automate Federated authentication using Azure B2C.

- Azure multi tenant cloud
- Windows shop
- Terraform
- Azure DevOps pipelines

DevOps Engineer DECEMBER 2019 - JANUARY 2021
Sensitech, Beverly

Build/deploy and maintain Artifactory and Atlassian suite on Azure Ubuntu VMs with nginx docker and application storage in SMB mounts using terraform. Environments could be spooled in 17 minutes in Azure VMs with previous day backups mounted to restore.

- Azure multi tenant cloud
- Windows/Linux shop
- Terraform
- nginx
- TFS/VSTS pipelines

Tech Lead MARCH 2019 - DECEMBER 2019
MFS/Kaygen, Boston

Troubleshoot and debug production issues, assist development team with design and architecture, automate and build powershell and SQL automations for multiple teams to reduce workload.

- On-Prem virtualized environment
- Windows shop
- Powershell
- Internal Processing Server (bash/powershell)
- Maestro

Senior Support Engineer SEPTEMBER 2016 - FEBRUARY 2019
Simcorp, Boston

Troubleshoot and triage both on premise and Azure issues, automate application prerequisites and install using powershell runbooks. Automations validated and configured IIS, SQL, and Windows Optional Features. Environment agnostic scripts.

- Hybrid Azure/On-Prem
- Windows shop
- Powershell
- IIS

Tech and Ops Analyst III OCTOBER 2014 - SEPTEMBER 2016
Santander US, Dorchester

Build and maintain .net and vb code for multiple business units, designed and implemented automations for key bank processes. Standalone and Office integrated vb apps to automatically solve and respond to requests.

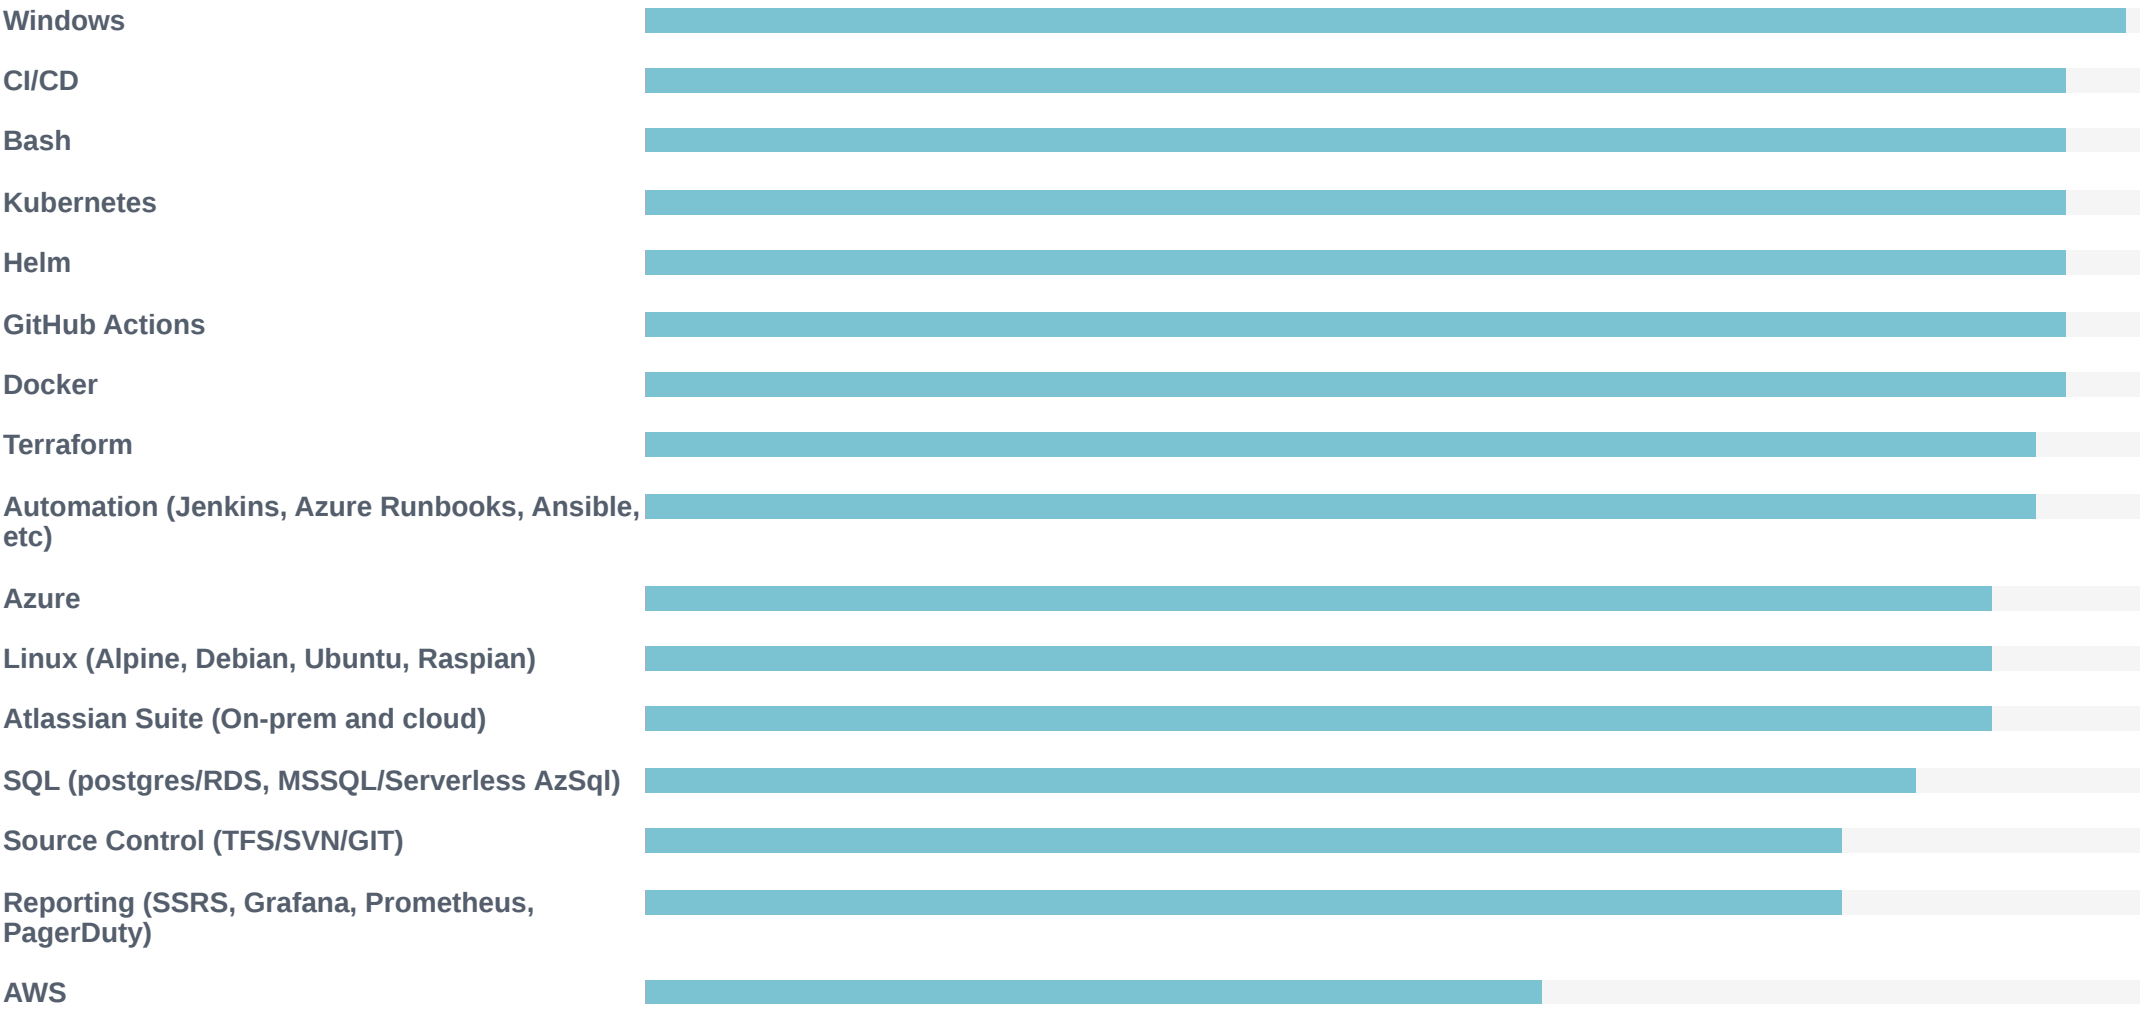

- On-Prem hardware environment
- Windows shop
- Visual Basic/.net

PROJECTS

Where possible, I like to ensure transparency and make my code openly available to anyone who wants to contibute or make suggestions on how to improve. If we aren't growing and learning, we are dying.

- MediaKube Redux - Open Source kubernetes cluster for media
- Xanderu Helpers - Open Source powershell pipeline creator
- Hanwha Vision - Enterprise repositories with Apache open source license for github actions and helm
